Community Se

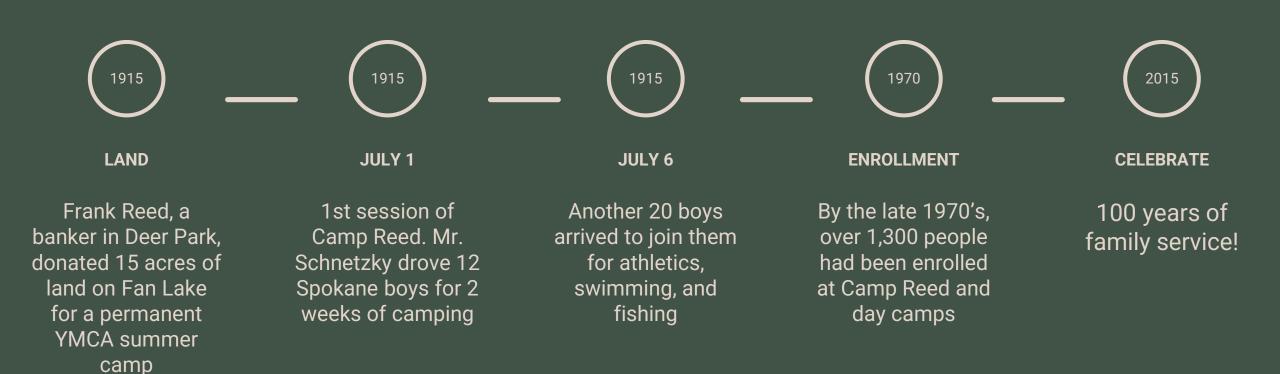

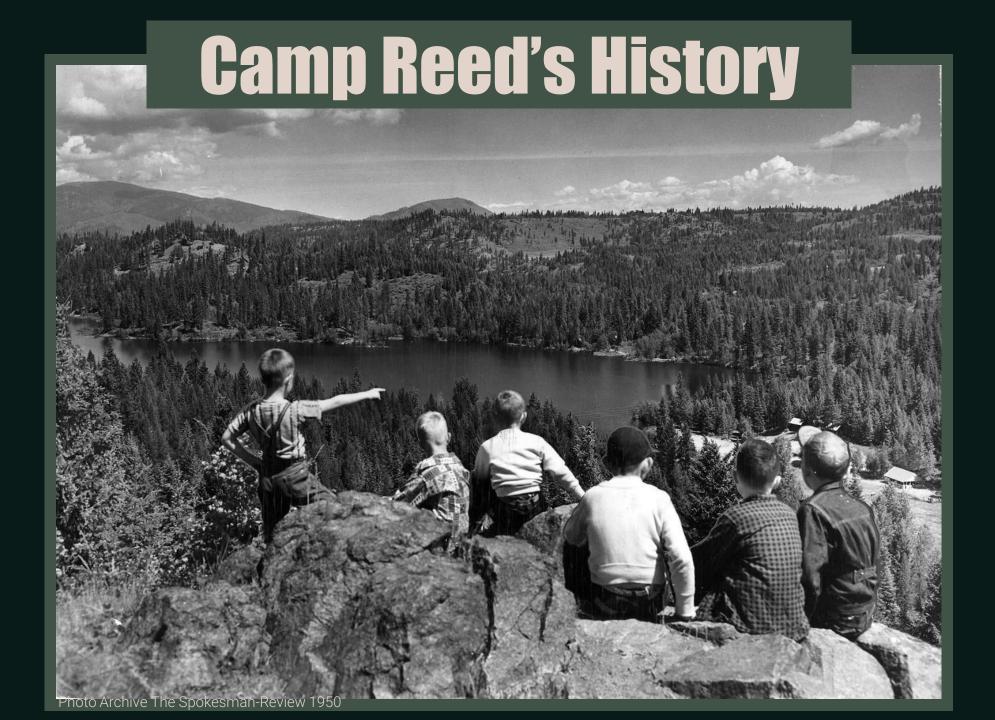

Camp Reed's History

• PURPOSE:

To develop leadership abilities in young people

- This has remained its backbone to this day
- IMPACT:

The camp has impacted 1,000's of youths

- In 2019, 1739 kids attended Camp Reed
- 1 in 4 campers receive scholarships
- Some have risen to prominent positions in government, commerce, and education in their communities and country
- USE:

Visionaries saw the value of a lakeside youth camp

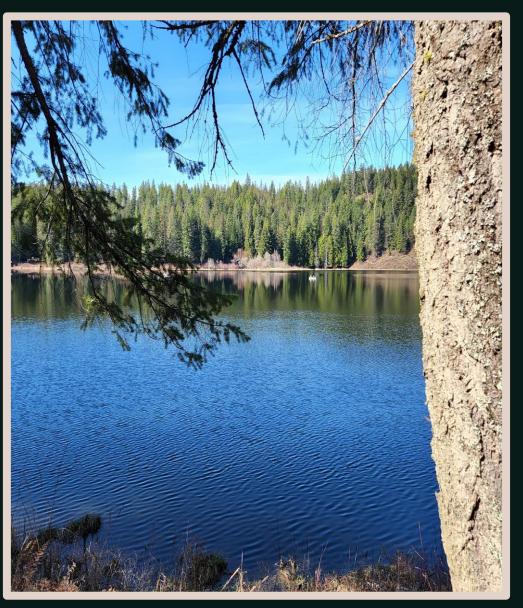

More land was bestowed, and businesses and civic groups donated services and materials to build cabins, docks and facilities on a camp that now spreads over 550 acres.

MISSION

Camp Reed's mission is to enhance personal growth, Christian values, and a sense of community in a safe wilderness setting. Through active participation in unique challenges and new relationships. Camp Reed transforms ideals into lasting behaviors. We embrace the YMCA's core values of respect, honesty, responsibility, and caring.

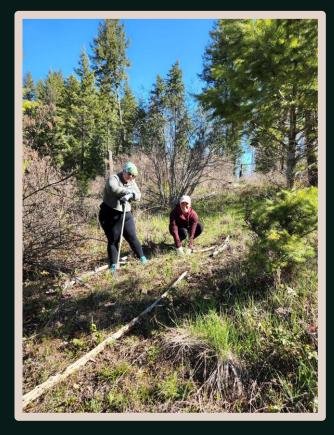

DURING+AFTER

IMPACT

CAMP REED

- With 555 acres of beautiful woodlands surrounding the lake, trees are often lost during windstorms each year.
- By planting hundreds of seedlings throughout the forest, we are able to replace lost trees and ensure both a natural habitat for wildlife and beautiful setting for Camp Reed.
- Only about 1 in 4 seedlings will survive, depending on weather this summer. Each tree helps preserve Camp Reed for more than 1,700 children each year!

WAIKIKI TRAIL HISTORY

• WHAT:

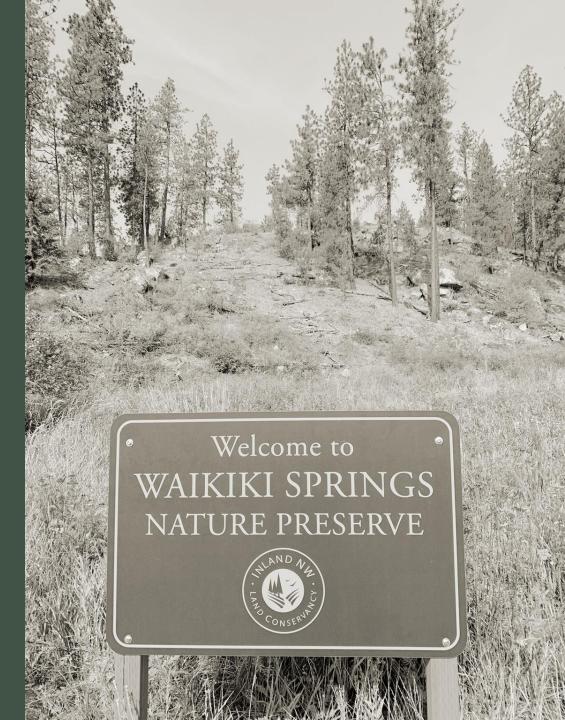

Waikiki = Spring Water It is named for the springs that flow from the hillside, into the river, keeping it a moderate temperature year-round.

• WHERE:

The 95-acre Nature Preserve is adjacent to Washington Department of Fish & Wildlife property of the same name

• WHEN:

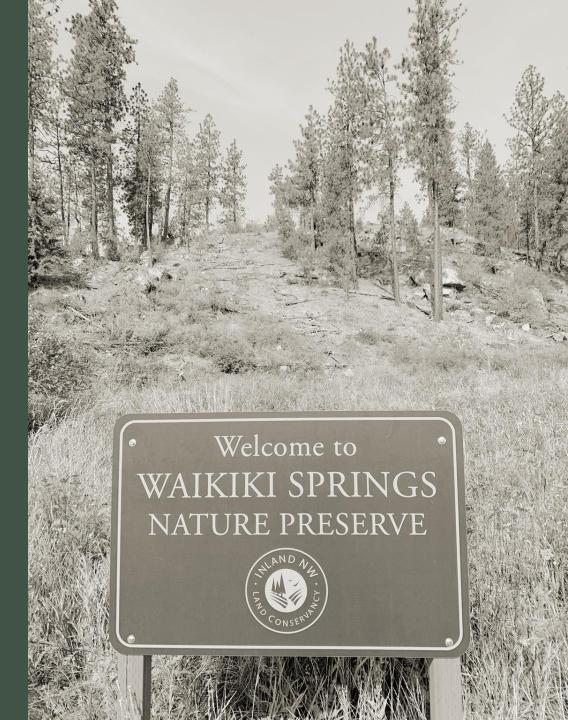

- Early 1900s this property was the site of the Waikiki Dairy, owned by Jay Graves, famous for bringing Whitworth University and the Olmsted brothers to Spokane
- \circ Since 1973 land owned by WDFW
- 1970s land purchased in hopes to be a fish hatchery
- In August 2020, the Spokane Tribe of Indians released 51 Chinook Salmon into the Little Spokane River

WAIKIKI TRAIL HISTORY

• WHY:

- The Spokane Tribe of Indians is the Conservancy's primary collaborator for the Waikiki Springs Nature Preserve.
- The preserve is on the Tribe's ancestral lands.
- Spokane ancestors were a river people, living a seminomadic way of life hunting, fishing, and gathering all creator had made available to them.
- Their primary diet consisted of what was taken from the water ways in the form of salmon, steelhead, eel, and shellfish which made up 60% of their diet.
- The Tribe's Division of Natural Resources is excited to partner with INLC to enhance the habitat
- The educational release in August of 2020 gave the community a chance to learn about traditional salmon runs that existed over a hundred years ago, before the installation of Little Falls Dam, and has allowed tribal biologists to study the fish's movement and behavior in this once native watershed.

D U R I N G

AFTER

IMPACT

COMMUNITY

- Additional trail loop will allow for more users to enjoy the park at any given time.
- Yet to be installed people counter will better determine overall traffic patterns
- Upgrades to accessibility will continue to raise awareness for the importance of preserving the Waikiki Springs area.

ENVIRONMENTAL

- Spokane Tribe of Indians is working to reintroduce salmon to the Spokane river at Waikiki Springs.
- Restoration/preservation of the trails is protecting the area from erosion and making for a cleaner river.
